DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d).

This application is in condition for allowance except for the following formal matters:

Claim Objections

2. Claim 6 is objected to because of the following informalities:

Re claim 6, line 2: "the duty factor" lacks of antecedent basis and should be substituted with "a duty factor". Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

3. Claims 1-5 and 7 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter:

The best prior art of record fails to teach or fairly suggest a non-contact IC card for communicating data with a reader/writer in a contactless manner, the IC card including frequency control means for changing an operation frequency of the non-contact IC card so that communication with the reader/writer and the encryption operations performed by the encryption means are carried out at different operation frequencies.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Posch et al. (US 6,814,295) teaches frequency sensor for each interface of a data carrier. Norton (US 6,616,054) teaches external power supply system, apparatus and method for smart card. US (6,895,502) teaches method and system for securely displaying and confirming request to perform operation on host computer. Teppler (US 6,792,536) teaches smart card system and methods for proving dates in digital files. Scott et al. (US 6,484,260) teaches personal identification system. Richards (US 6,385,723) teaches key transformation unit for an IC card. Jones et al. (US 5,623,637) teaches encrypted data storage card including smart card integrated circuit for storing an access password and encryption keys. Smola et al. (US 6,690,556) teaches integrated circuit.
